

## Strategic Partnership between Innofreight and EP Cargo

Innofreight and EP Cargo are pleased to announce the start of strategic cooperation in the area of tailor-made bulk cargo projects in various industrial areas e.g. mining, coke and coal, steel industry etc., with a special focus to territories of Germany, Czech Republic, Poland and Slovak Republic.

Mutual cooperation is focused on projects in containerized transports of hard coal, lignite, coke, ashes and other energy by-products but also metals, aggregates, pellets, wood chips etc.

Innofreight as a provider of its high performing state-of-the-art technology creates for its customers great opportunities in cost reductions and greater operational efficiencies against conventional rail technologies in many industries, including coal mining, energy production, steel industry, pulp and paper industry and many others.

EP Cargo with its region-wide presence and strong financial background provides complex logistics solutions for major regional utilities, large bulk traders and offtakers and other customers primarily in energy, steel and construction sectors. EP Cargo is a subsidiary to EP Holding (EP Energy), one of the largest regional energy utility.
